Southwest Alaska Network
Inventory and Monitoring Program

Cooperative Agreement Number 1443CA991000013
Funding Source: National Park Service, SW Alaska Network

ABSTRACT

As part of the Inventory and Monitoring effort of the National Park Service's Southwest Alaska Network, the Alaska Natural Heritage Program (AKNHP) conducted an inventory of the vascular plants in Lake Clark National Park and Preserve. The primary goal of the inventory was to document the occurrence of 90% of the vascular plant taxa that are expected to occur in the park. Secondary goals included describing the distribution and abundance of rare taxa and other species of special concern and documenting the general distribution of vascular plants across the ecoregions of the park. We used existing collections and records to establish a list of plant species known or expected to occur in the park and we plotted the known species and collection localities on a geographic information system along with topographic maps, park ecoregions, and aerial photography. Using this information and additional data on geology, vegetation and landforms we selected sampling sites to assure adequate representation in park ecoregions while also targeting suspected floristic hotspots. Crews of 2-4 botanists visited the sites collecting species new to the park or ecoregion or otherwise of interest for the flora of the park. Collecting was done between 5 June and 15 August 2001. A total of 712 collections were made representing approximately 375 vascular plant taxa. Of these taxa, 13 were previously unrecorded for the Park (including a collection of the mustard family genus *Arabis* that is possibly new to science), and approximately 70 were previously listed as Unconfirmed. Permanent herbarium collections are curated and archived at the University of Alaska Museum Herbarium, Fairbanks (ALA) with a duplicate collection at the Lake Clark National Park and Preserve Herbarium at Port Alsworth. Collection information has been databased at ALA and will be entered into the Park Service NPSpecies database. Rare plant information will be entered in the database of the Alaska Natural Heritage Program.

INTRODUCTION

In 1998, Congress passed the National Parks Omnibus Management Act that mandated the establishment of Servicewide Inventory and Monitoring (I&M) Programs. The Servicewide goals of the I&M program are to establish baseline information about park resources and to provide information on the long-term trends and condition of those resources.

In 2001, as part of this I&M program, the Alaska Natural Heritage Program (AKNHP) contracted with the Southwest Alaska Network of the National Park Service (SWAN) to conduct an inventory of the vascular plant taxa within Lake Clark National Park and Preserve (LACL). This inventory was anticipated to be the beginning of an overall vascular plant inventory for all of the parks in the SWAN.

The primary goal of the inventories is to document the occurrence of at least 90% of the vascular plant taxa that are expected to occur in each park. Secondary goals include describing the distribution and abundance of rare taxa and other species of special concern and documenting (by collections) the general distribution of vascular plants across the ecoregions of the park.

Plant collections from LACL earlier than 50 years ago are rare, but recent years have seen substantial collecting efforts. The first significant plant collections were made by Racine and Young (1978) and their study provided the basis for much of what is known of the flora and vegetation. The most extensive collecting has been done by Caswell (from 1996 – 2001) and his collections have greatly enhanced our knowledge of the flora, particularly the less common species. Other significant collections were made by Moore and other park personnel. Bennett and Tande (1996) conducted studies of the coastal vegetation and flora and made significant collections in these areas.

METHODS AND MATERIALS

In order to attain the goal of documenting 90% of the expected flora, we adopted a reconnaissance method of floristic survey. This method was recommended as the best approach for plant inventories in all Alaska parks by the botanists at the April 2000 scoping meeting and by the Alaska Plant Inventory Working Group at their September 2000 meeting. The reconnaissance method involves identifying survey areas within landscape units via spatial analysis using key criteria such as:

- regionally unique geological or geomorphologic features
- communities or habitats of biological concern
- likely habitats of expected species, as indicated by regional floras and park collections
- under-represented plant communities in existing inventories
- minimum sample unit allocation to each major ecoregion province delineated or to other target landscape strata
- logistical feasibility (e.g., access means, cost)
- potential of certain types of sites to maximize species and communities encountered (e.g., ecotones, high gradient areas)

This method maximizes the diversity of both species and plant community-types encountered within each survey area.

Targeted sampling was incorporated into the study design to ensure that we sampled in unique sites or habitats where species that are expected, but not yet documented, may exist. Targeted sampling is considered a critical means of reaching the 90% documented occurrence goal as set forth by the Service wide Inventory and Monitoring program.

Prior to beginning the vascular plant inventory, the AKNHP conducted a detailed review of existing collections and literature to determine the known and expected species within LACL. These sources included collections at the University of Alaska Museum Herbarium (ALA), collections at the LACL herbarium, and literature records (Caswell 2000, Hulten 1941-50, Racine and Young 1976, Bennett and Tande 1996). Records from these sources were entered into the National Park Services NPSpecies database and taxa were assigned a Park Status as Present, Probably Present, or Unconfirmed. Only those taxa that were documented by reliably verified collections from within LACL were classified as Present. Taxa only known from literature records or from unverified collections were classified as Unconfirmed. Taxa not yet recorded from LACL but that were known from regions adjacent to the park (within 50km) or that were otherwise considered likely to occur in LACL were classified as Probably Present. These lists continued to be revised up to and during the 2001 inventory, but were used to form the initial targets of taxa to collect. The lists were also used to highlight rare taxa that would receive special attention during the inventory.

Verified collections, along with ecoregion boundaries, were entered into ArcView, a geographic information system and used (along with aerial photographs and surficial geology) to determine gaps in eco-geographic coverage of the existing collections (Figure 1). Most notable were gaps in the northern, southern and eastern edges of LACL along with a lack of collections in coastal areas, especially estuarine areas and coastal subalpine meadows. Information on unusual substrates was also sought, including mineralized and calcareous areas, springs, sand dunes or blowouts, and well-watered high elevation meadows. No collections were known from limestone or strongly calcareous substrates, and few limestone areas are known for the park. Limestone floras are usually dramatically different from adjacent acidic floras and often contain rare or unusual species. These were considered a high priority if they could be located.

Site selection for sampling was driven by practical constraints as well as biological concerns. Many of the collecting gaps resulted from the inaccessibility of these areas (e.g. the northern and eastern edges of the park) and the need for long helicopter flights; financial constraints would limit our access to these sites. Concern with inholdings also precluded some areas, especially in the southern portion of the park. While we did sample some coastal sites, guidance from the SWAN team suggested that this inventory should focus on non-coastal areas, with the intent to sample coastal areas in the following year.

An initial list of sampling sites had been drawn up by Phil Caswell of the NPS and this list was further refined with information from literature review, the ArcView layers, and consultations with knowledgeable personnel from LACL and the Regional Office of NPS.

Field work was based out of the Park headquarters at Port Alsworth and conducted between 5 June and 15 August 2001. Site selection was further refined after overflights and in response to information gathered throughout the season. Eighty-eight collecting localities were sampled from 50 general localities over the course of the summer (Table 1). Sites were accessed by fixed wing, helicopter, boat and on foot. An exceptionally heavy snow pack at sites along the southern and eastern borders of the park precluded early sampling of those sites. Opportunistic sampling was also incorporated by stationing a crew member at a bear camp above Tuxedni Bay and by encouraging members of fisheries field crews stationed at sites we were not able to visit. Collection sites for the 2001 season are depicted in Figure 2. During the field season we were able to verify some of the unconfirmed collections at the LACL herbarium. The remainder were verified the following year by Al Batten from the University of Alaska Museum.

Figure 1. Vascular plant collection localities within LACL prior to 2001.

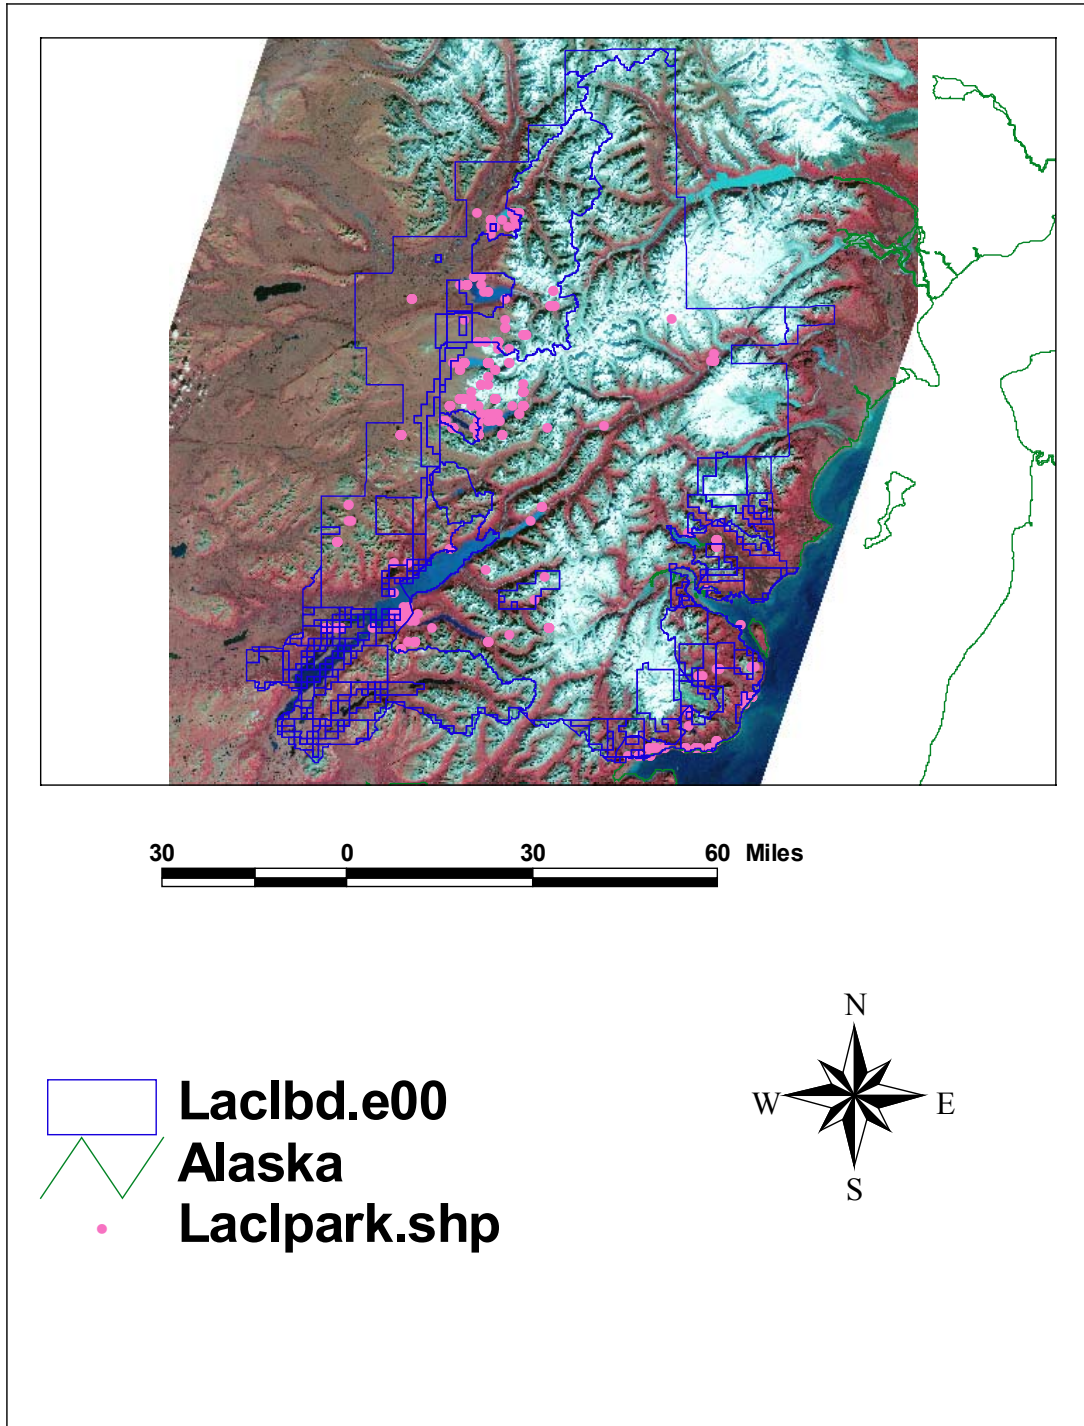

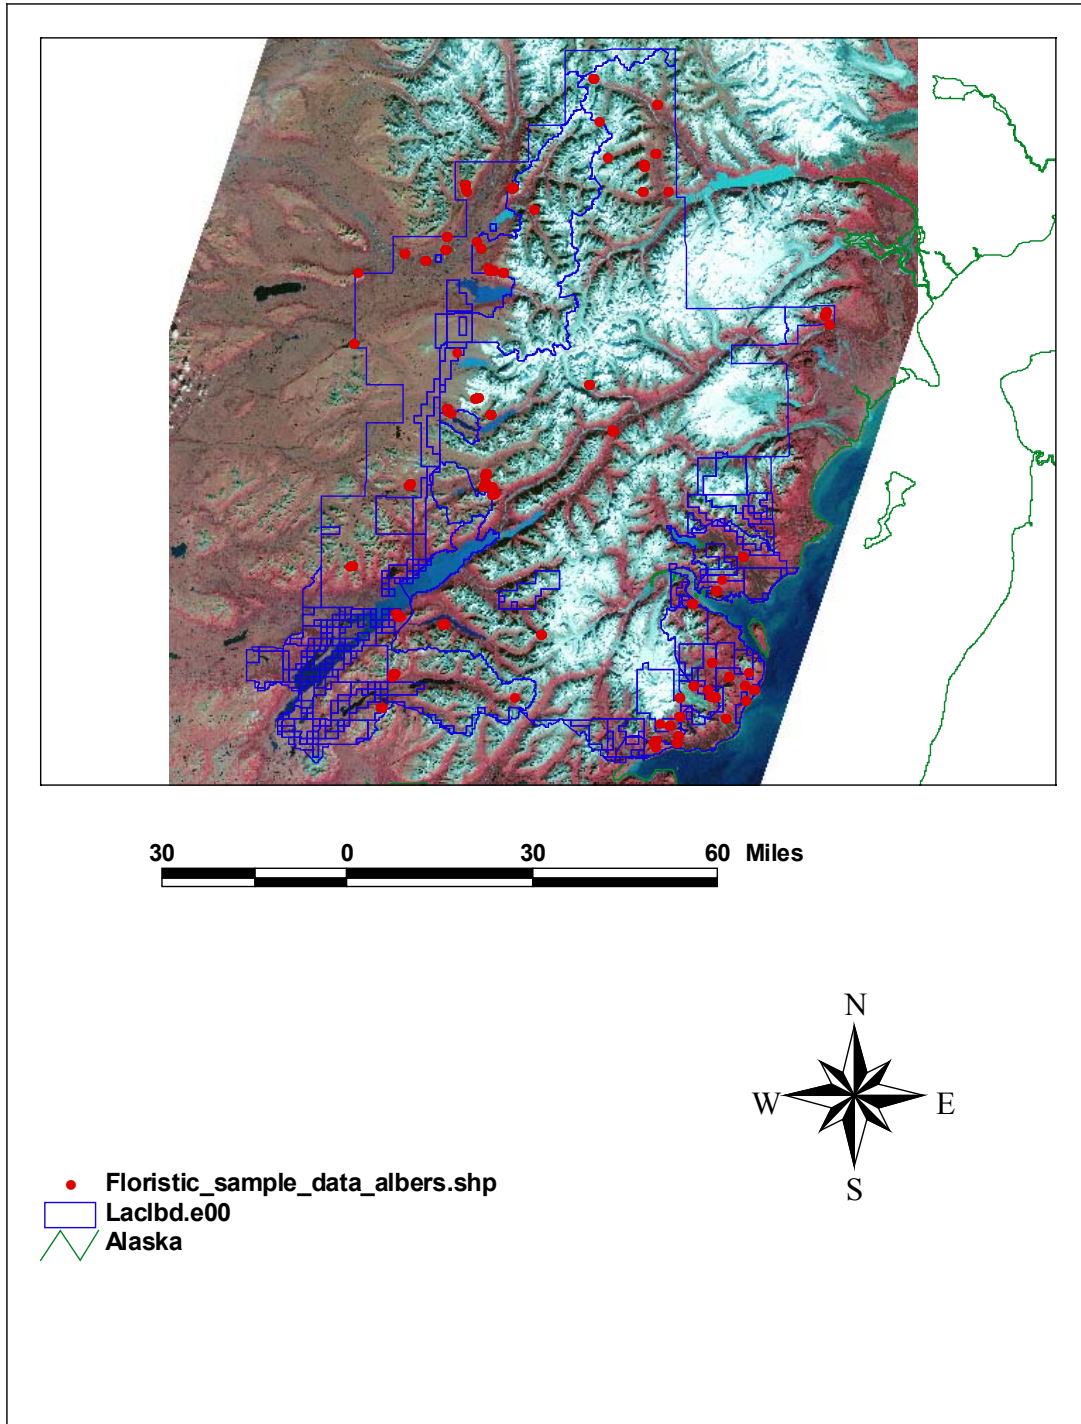

Figure 2. Collecting localities for the 2001 Vascular Plant Inventory of LACL.

Fieldwork was done by teams of 2-3 botanists each. Each site was mapped on an aerial photo or USGS topographic map and a georeference point was recorded using GPS. The routes surveyed were mapped. Representative photos were taken of sites, including communities, unusual landforms, and notable plants.

- A description of each site was recorded and significant landforms and plant associations described.
- A species list was made for each site with notes on abundance and habitat for all taxa collected and other taxa where possible.
- Vouchers were collected and curated as discussed below.

Vouchers were collected for all species that were new to the park or ecoregion, species of concern (rare, endemic, invasive), geographic or ecological range extensions and for specimens not identifiable in the field. Specimens of *Botrychium* were sent in fresh condition to Donald Farrar for isozyme analysis. For all collections we recorded: date, unique collection number, latitude and longitude (NAD27, decimal degrees); slope, aspect, elevation, topographic position, associated landforms, associated species, vegetation class, substrate, soil moisture, soil type, drainage, parent material, cover class or frequency class, notes on characters not preserved well, associated photo number, phenology and ecological observations. The size of the population and area surveyed was noted for species of concern.

Collections were made only when the population was large enough to support removal of individuals and generally followed the collecting protocol of Parker and Murray (1992). Duplicate collections were made when possible, with the first archived at the Herbarium of the University of Alaska Museum (ALA) and the second set sent to LACL.

Specimens will be sorted, examined and determined by the botanists who collected them and the collections sent to ALA for verification or identification by the Museum staff. Some specimens (e.g. *Botrychium*, some mustards, et al.) were sent out to authorities by ALA for determination.

Rare plant sighting forms (with maps) were completed for taxa with an AKNHP rank of S3 or less.

RESULTS and DISCUSSION

Seven hundred and twelve collections were made during the 2001 season representing approximately 375 vascular plant taxa (including infraspecific taxa) (Appendix 1). These taxa representing 53 families and 183 genera. Of these taxa, 13 were previously unrecorded for the Park (including one possibly new to science), and approximately 70 were previously Unconfirmed.

Taxa new to the park are:

Amaranthus retroflexus (introduced)
Botrychium alaskense
Botrychium minganense
Carex phyllomannica
Chrysanthemum vulgare (introduced)
Draba cinerea
Mertensia paniculata var. *paniculata*
Oxytropis jordalii
Pedicularis parviflora ssp. *pennellii*
Potentilla drummondii
Saxifraga tricuspidata
Solidago canadensis var. *salebrosa*

Several collections are still awaiting final determinations by specialists. These include a species of *Arabis* (possibly new to science) from alpine scree and meadows near Saddle Mountain. *Potentilla drummondii* represents a significant range extension for this rock rose that is only known from a handful of sites in south central Alaska, where it is disjunct from its main distribution in the Pacific Northwest. The moonworts (*Botrychium* spp.) also present an increasingly interesting story in Alaska. The Lake Clark collections of *B. alaskense* constitute a new record for this recently described species (Wagner and Grant 2002). In addition, D. Farrar (pers. comm.) notes that “the Iliamna Volcano *B. lanceolatum* is also very interesting. Plants there have a genotype that we have seen elsewhere only in Greenland and Iceland!”

Determining the expected species in areas that are poorly explored and difficult to access is fraught with difficulty. The method used here—species occurring within 50km of a park—is a very rough approximation at best. Even after revisions were made (based on likely habitats and geography) these lists will undoubtedly need further modification. As the inventory progressed we were able to refine the numbers and will continue to do so. Certainly, new species will continue to be added to LACL over the coming years, but it is likely that the major additions to the flora have already been made. Of special interest will be range extensions from the Interior into the northern part of LACL (e.g. *Saxifraga tricuspidata*) and as well as range extensions for rare taxa such as *Potentilla drummondii* and the unusual *Arabis*.

PLANS FOR COMING YEAR

The spreadsheet will be finalized and edited as the few remaining collections are identified. ArcView coverages will be completed and edited and all rare taxa entered into the AKNHP database.

As mentioned above, LACL is very rich floristically, with a number of rare or restricted taxa, but it is unlikely to yield high numbers of additional taxa new to the park. Coastal areas have still not been adequately sampled, and the estuarine halophytic meadows and floristically diverse subalpine meadows in the southeast portion of the park merit attention.

Carbonate outcrops near Kontrashibuna, Martha's Mountain, Portage Lake and calcareous sedimentary outcrops by the coast should also be visited. The brief visits made in 2001 were late in the season and hurried in nature.

The Saddle Mountain location for the *Arabis* should be revisited and additional material and notes obtained. This area and the nearby Barren Hills seem distinctive and different enough to warrant additional visits.

Although we did sample the northern border of the park, late snowmelt limited our access to sites. This is a relatively expensive area to reach, but has received very little botanizing. High basins and ridges along the southern border of the park are closer to access but were also heavily loaded with snow early in the season. Although we found little of interest, some sites may repay additional effort.

ACKNOWLEDGMENTS

This project was made possible by the NPS through their funding of a Cooperative Agreement and we gratefully acknowledge their support. The staff of the Park Service I&M Program, especially Sara Wesser, Blaine Anderson and Susan Kedzie-Webb, were especially helpful. Many thanks also to the staff at LACL, most especially Penny Knuckles who had the energy to make this inventory happen and who also helped in the field. Finally, the field crew of Anna Jansen, Eve Laeger and Phil Caswell put in long hours in often difficult conditions to secure the collections that are the heart of the project. Phil Caswell deserves special praise for his many years as a volunteer botanist at LACL (and elsewhere in Alaska) and for the many additions he has made to our knowledge of the flora of Alaska.

APPENDIX A

Vascular Plant taxa collected by the 2001 Lake Clark Vascular Plant Inventory.

All taxa are documented by collections held at the University of Alaska Museum Herbarium. For most, there is a duplicate set at the Lake Clark National Park Herbarium. Nomenclature follows ALA and is largely consistent with ITIS.

Family	Trinomial
Adoxaceae	<i>Adoxa moschatellina</i>
Amaranthaceae	<i>Amaranthus retroflexus</i>
Apiaceae	<i>Angelica genuflexa</i>
Apiaceae	<i>Bupleurum triradiatum</i>
Apiaceae	<i>Cicuta virosa</i>
Asteraceae	<i>Achillea borealis</i>
Asteraceae	<i>Antennaria alpina</i>
Asteraceae	<i>Antennaria friesiana</i>
Asteraceae	<i>Antennaria monocephala</i>
Asteraceae	<i>Antennaria rosea</i>
Asteraceae	<i>Antennaria rosea</i> ssp. <i>pulvinata</i>
Asteraceae	<i>Arnica</i> sp.
Asteraceae	<i>Arnica griscomii</i> ssp. <i>frigida</i>
Asteraceae	<i>Arnica lanceolata</i>
Asteraceae	<i>Arnica lanceolata</i> ssp. <i>amplexicaulis</i>
Asteraceae	<i>Arnica latifolia</i>
Asteraceae	<i>Artemisia hyperborea</i>
Asteraceae	<i>Artemisia tilesii</i>
Asteraceae	<i>Aster sibiricus</i>
Asteraceae	<i>Chrysanthemum vulgare</i>
Asteraceae	<i>Erigeron acris</i>
Asteraceae	<i>Erigeron eriocephalus</i>
Asteraceae	<i>Erigeron humilis</i>
Asteraceae	<i>Erigeron pallens</i>
Asteraceae	<i>Erigeron peregrinus</i>
Asteraceae	<i>Hieracium gracile</i>
Asteraceae	<i>Hieracium triste</i>
Asteraceae	<i>Packera cymbalaria</i>
Asteraceae	<i>Packera ogotorukensis</i>
Asteraceae	<i>Petasites frigidus</i> ssp. <i>nivalis</i>
Asteraceae	<i>Saussurea angustifolia</i>
Asteraceae	<i>Saussurea nuda</i>
Asteraceae	<i>Senecio congestus</i>
Asteraceae	<i>Senecio lugens</i>

Asteraceae	Senecio triangularis
Asteraceae	Solidago canadensis var. salebrosa
Asteraceae	Solidago multiradiata var. multiradiata
Asteraceae	Taraxacum carneocoloratum
Asteraceae	Taraxacum ceratophorum
Asteraceae	Taraxacum kamtschaticum
Asteraceae	Tephrosieris lindstroemii
Betulaceae	Alnus viridis ssp. crispa
Betulaceae	Betula glandulosa
Betulaceae	Betula kenaica
Betulaceae	Betula nana
Boraginaceae	Mertensia paniculata var. paniculata
Boraginaceae	Myosotis alpestris ssp. asiatica
Brassicaceae	Aphragmus eschscholtzianus
Brassicaceae	Arabis kamchatica
Brassicaceae	Arabis sp.
Brassicaceae	Cardamine bellidifolia
Brassicaceae	Cardamine umbellata
Brassicaceae	Draba alpina
Brassicaceae	Draba aurea
Brassicaceae	Draba borealis
Brassicaceae	Draba cinerea
Brassicaceae	Draba fladnizensis
Brassicaceae	Draba glabella
Brassicaceae	Draba lactea
Brassicaceae	Draba lonchocarpa
Brassicaceae	Draba longipes
Brassicaceae	Draba nivalis
Brassicaceae	Draba ruaxes
Brassicaceae	Draba stenoloba
Brassicaceae	Draba stenopetala
Brassicaceae	Parrya nudicaulis
Brassicaceae	Rorippa palustris
Brassicaceae	Thlaspi arcticum
Callitrichaceae	Callitriche sp.
Caprifoliaceae	Linnaea borealis
Caprifoliaceae	Viburnum edule
Caryophyllaceae	Cerastium arvense
Caryophyllaceae	Cerastium beeringianum
Caryophyllaceae	Gastrolychnis apetala
Caryophyllaceae	Minuartia arctica
Caryophyllaceae	Minuartia biflora
Caryophyllaceae	Minuartia elegans

Caryophyllaceae	Minuartia macrocarpa
Caryophyllaceae	Minuartia rubella
Caryophyllaceae	Moehringia lateriflora
Caryophyllaceae	Sagina intermedia
Caryophyllaceae	Silene acaulis
Caryophyllaceae	Spergula arvensis
Caryophyllaceae	Stellaria borealis
Caryophyllaceae	Stellaria borealis ssp. borealis
Caryophyllaceae	Stellaria borealis ssp. sitchana
Caryophyllaceae	Stellaria crassifolia
Caryophyllaceae	Stellaria edwardsii
Caryophyllaceae	Stellaria longifolia
Caryophyllaceae	Stellaria longipes
Caryophyllaceae	Stellaria media
Caryophyllaceae	Wilhelmsia physodes
Chenopodiaceae	Atriplex gmelinii
Chenopodiaceae	Chenopodium album
Cornaceae	Cornus canadensis
Cornaceae	Cornus canadensis_x_suecica
Cornaceae	Cornus suecica
Crassulaceae	Rhodiola integrifolia
Cyperaceae	Carex sp.
Cyperaceae	Carex anthoxanthea
Cyperaceae	Carex aquatilis
Cyperaceae	Carex bigelowii
Cyperaceae	Carex brunnescens
Cyperaceae	Carex canescens
Cyperaceae	Carex capillaris
Cyperaceae	Carex eleusinoides
Cyperaceae	Carex enanderi
Cyperaceae	Carex garberi
Cyperaceae	Carex gynocrates
Cyperaceae	Carex kelloggii
Cyperaceae	Carex lachenalii
Cyperaceae	Carex leptalea
Cyperaceae	Carex limosa
Cyperaceae	Carex loliacea
Cyperaceae	Carex lyngbyei
Cyperaceae	Carex macloviana
Cyperaceae	Carex macrochaeta
Cyperaceae	Carex magellanica
Cyperaceae	Carex media
Cyperaceae	Carex membranacea

Cyperaceae	Carex mertensii
Cyperaceae	Carex microchaeta
Cyperaceae	Carex micropoda
Cyperaceae	Carex misandra
Cyperaceae	Carex nardina
Cyperaceae	Carex nigricans
Cyperaceae	Carex oederi ssp. viridula
Cyperaceae	Carex pachystachya
Cyperaceae	Carex pauciflora
Cyperaceae	Carex phyllomannica
Cyperaceae	Carex pluriflora
Cyperaceae	Carex podocarpa
Cyperaceae	Carex rariflora
Cyperaceae	Carex rupestris
Cyperaceae	Carex saxatilis
Cyperaceae	Carex scirpoidea
Cyperaceae	Carex spectabilis
Cyperaceae	Carex utriculata
Cyperaceae	Carex vaginata
Cyperaceae	Eleocharis kamtschatica
Cyperaceae	Eleocharis palustris
Cyperaceae	Eriophorum angustifolium ssp. subarcticum
Cyperaceae	Eriophorum russeolum
Cyperaceae	Eriophorum russeolum var. rufescens
Cyperaceae	Eriophorum scheuchzeri
Cyperaceae	Kobresia myosuroides
Cyperaceae	Trichophorum caespitosum
Diapensiaceae	Diapensia lapponica
Droseraceae	Drosera rotundifolia
Equisetaceae	Equisetum arvense
Equisetaceae	Equisetum fluviatile
Equisetaceae	Equisetum palustre
Equisetaceae	Equisetum pratense
Equisetaceae	Equisetum scirpoides
Equisetaceae	Equisetum variegatum
Ericaceae	Cassiope lycopodioides
Ericaceae	Cassiope tetragona
Ericaceae	Empetrum nigrum
Ericaceae	Ledum palustre
Ericaceae	Phyllodoce aleutica
Ericaceae	Rhododendron lapponicum
Ericaceae	Vaccinium ovalifolium

Ericaceae	<i>Vaccinium uliginosum</i>
Ericaceae	<i>Vaccinium vitis-idaea</i>
Fabaceae	<i>Astragalus alpinus</i>
Fabaceae	<i>Astragalus nutzotinensis</i>
Fabaceae	<i>Astragalus polaris</i>
Fabaceae	<i>Lathyrus maritimus</i>
Fabaceae	<i>Lupinus nootkatensis</i>
Fabaceae	<i>Oxytropis jordalii</i>
Fabaceae	<i>Oxytropis maydelliana</i>
Fabaceae	<i>Oxytropis mertensiana</i>
Fabaceae	<i>Oxytropis varians</i>
Fabaceae	<i>Oxytropis viscida</i>
Fumariaceae	<i>Corydalis pauciflora</i>
Gentianaceae	<i>Gentiana prostrata</i>
Gentianaceae	<i>Gentianella amarella</i>
Haloragaceae	<i>Hippuris vulgaris</i>
Iridaceae	<i>Iris setosa</i>
Juncaceae	<i>Juncus alpinus</i>
Juncaceae	<i>Juncus bufonius</i>
Juncaceae	<i>Juncus castaneus</i>
Juncaceae	<i>Juncus mertensianus</i>
Juncaceae	<i>Juncus triglumis</i>
Juncaceae	<i>Juncus triglumis ssp. albescens</i>
Juncaceae	<i>Luzula arcuata ssp. arcuata</i>
Juncaceae	<i>Luzula arcuata ssp. unalaschcensis</i>
Juncaceae	<i>Luzula parviflora</i>
Juncaceae	<i>Luzula spicata</i>
Juncaceae	<i>Luzula tundricola</i>
Juncaceae	<i>Luzula wahlenbergii</i>
Juncaginaceae	<i>Triglochin palustre</i>
Lentibulariaceae	<i>Pinguicula villosa</i>
Lentibulariaceae	<i>Utricularia intermedia</i>
Lentibulariaceae	<i>Utricularia minor</i>
Liliaceae	<i>Allium schoenoprasum</i>
Lycopodiaceae	<i>Diphasiastrum sitchense</i>
Lycopodiaceae	<i>Huperzia selago</i>
Lycopodiaceae	<i>Lycopodium alpinum</i>
Lycopodiaceae	<i>Lycopodium clavatum</i>
Menyanthaceae	<i>Menyanthes trifoliata</i>
Nymphaeaceae	<i>Nuphar polysepalum</i>
Onagraceae	<i>Circaea alpina</i>
Onagraceae	<i>Epilobium anagallidifolium</i>
Onagraceae	<i>Epilobium angustifolium</i>

Onagraceae	<i>Epilobium davuricum</i>
Onagraceae	<i>Epilobium hornemannii</i>
Onagraceae	<i>Epilobium hornemannii</i> ssp. <i>hornemannii</i>
Onagraceae	<i>Epilobium latifolium</i>
Onagraceae	<i>Epilobium palustre</i>
Ophioglossaceae	<i>Botrychium minganense</i>
Ophioglossaceae	<i>Botrychium alaskense</i>
Ophioglossaceae	<i>Botrychium lanceolatum</i>
Ophioglossaceae	<i>Botrychium lunaria</i>
Ophioglossaceae	<i>Botrychium pinnatum</i>
Orchidaceae	<i>Coeloglossum</i>
Orchidaceae	<i>Coeloglossum viride</i>
Orchidaceae	<i>Corallorhiza trifida</i>
Orchidaceae	<i>Cypripedium guttatum</i>
Orchidaceae	<i>Goodyera repens</i>
Orchidaceae	<i>Listera cordata</i>
Orchidaceae	<i>Platanthera dilatata</i>
Orchidaceae	<i>Platanthera hyperborea</i>
Orchidaceae	<i>Platanthera obtusata</i>
Orchidaceae	<i>Spiranthes romanzoffiana</i>
Orobanchaceae	<i>Boschniakia rossica</i>
Papaveraceae	<i>Papaver</i>
Papaveraceae	<i>Papaver macounii</i>
Papaveraceae	<i>Papaver radicum</i>
Papaveraceae	<i>Papaver radicum</i> ssp. <i>alaskanum</i>
Papaveraceae	<i>Papaver radicum</i> ssp. <i>radicum</i>
Plumbaginaceae	<i>Armeria maritima</i>
Poaceae	<i>Agrostis alaskana</i>
Poaceae	<i>Agrostis mertensii</i>
Poaceae	<i>Agrostis scabra</i>
Poaceae	<i>Alopecurus aequalis</i>
Poaceae	<i>Arctophila fulva</i>
Poaceae	<i>Bromus</i>
Poaceae	<i>Calamagrostis canadensis</i>
Poaceae	<i>Calamagrostis canadensis</i> ssp. <i>canadensis</i>
Poaceae	<i>Calamagrostis canadensis</i> ssp. <i>langsдорffii</i>
Poaceae	<i>Calamagrostis deschampsoides</i>
Poaceae	<i>Calamagrostis lapponica</i>
Poaceae	<i>Deschampsia cespitosa</i> ssp. <i>glauca</i>
Poaceae	<i>Elymus trachycaulus</i>
Poaceae	<i>Elymus trachycaulus</i> ssp. <i>trachycaulus</i>

Poaceae	<i>Elymus trachycaulus</i> ssp. <i>violaceus</i>
Poaceae	<i>Festuca altaica</i>
Poaceae	<i>Festuca brachyphylla</i>
Poaceae	<i>Festuca brevissima</i>
Poaceae	<i>Festuca rubra</i>
Poaceae	<i>Festuca rubra</i> ssp. <i>richardsonii</i>
Poaceae	<i>Festuca rubra</i> ssp. <i>rubra</i>
Poaceae	<i>Festuca vivipara</i>
Poaceae	<i>Hierochloa odorata</i>
Poaceae	<i>Leymus mollis</i> ssp. <i>mollis</i>
Poaceae	<i>Lolium multiflorum</i>
Poaceae	<i>Lolium perenne</i> ssp. <i>multiflorum</i>
Poaceae	<i>Phleum pratense</i>
Poaceae	<i>Phleum alpinum</i>
Poaceae	<i>Poa</i> sp.
Poaceae	<i>Poa alpina</i>
Poaceae	<i>Poa arctica</i>
Poaceae	<i>Poa arctica</i> ssp. <i>lanata</i>
Poaceae	<i>Poa glauca</i>
Poaceae	<i>Poa palustris</i>
Poaceae	<i>Poa paucispicula</i>
Poaceae	<i>Poa pratensis</i>
Poaceae	<i>Poa pratensis</i> ssp. <i>alpigena</i>
Poaceae	<i>Poa pseudoabbreviata</i>
Poaceae	<i>Trisetum spicatum</i> ssp. <i>molle</i>
Poaceae	<i>Vahlodea atropurpurea</i>
Polemoniaceae	<i>Polemonium boreale</i>
Polemoniaceae	<i>Polemonium boreale</i> var. <i>villosissimum</i>
Polygonaceae	<i>Koenigia islandica</i>
Polygonaceae	<i>Rumex acetosa</i>
Polygonaceae	<i>Rumex acetosella</i>
Polygonaceae	<i>Rumex arcticus</i>
Polygonaceae	<i>Rumex beringensis</i>
Polypodiaceae	<i>Cryptogramma sitchensis</i>
Polypodiaceae	<i>Cystopteris fragilis</i>
Polypodiaceae	<i>Dryopteris expansa</i>
Polypodiaceae	<i>Gymnocarpium dryopteris</i>
Polypodiaceae	<i>Polystichum lonchitis</i>
Portulacaceae	<i>Claytonia scammaniana</i>
Portulacaceae	<i>Montia fontana</i>
Potamogetonaceae	<i>Potamogeton alpinus</i>
Potamogetonaceae	<i>Potamogeton gramineus</i>
Potamogetonaceae	<i>Potamogeton richardsonii</i>

Potamogetonaceae	Stuckenia filiformis
Potamogetonaceae	Stuckenia vaginatus
Primulaceae	Dodecatheon frigidum
Primulaceae	Douglasia alaskana
Primulaceae	Primula cuneifolia
Primulaceae	Primula egaliksensis
Primulaceae	Trientalis europea
Pyrolaceae	Monesis uniflora
Pyrolaceae	Pyrola chlorantha
Pyrolaceae	Pyrola grandiflora
Pyrolaceae	Pyrola minor
Ranunculaceae	Aconitum delphinifolium ssp. delphinifolium
Ranunculaceae	Anemone richardsonii
Ranunculaceae	Caltha natans
Ranunculaceae	Coptis trifolia
Ranunculaceae	Potentilla drummondii
Ranunculaceae	Ranunculus cymbalaria
Ranunculaceae	Ranunculus eschscholtzii
Ranunculaceae	Ranunculus gelidus
Ranunculaceae	Ranunculus gmelinii
Ranunculaceae	Ranunculus hyperboreus
Ranunculaceae	Ranunculus nivalis
Ranunculaceae	Ranunculus occidentalis
Ranunculaceae	Ranunculus occidentalis var. brevistylis
Ranunculaceae	Ranunculus reptans
Ranunculaceae	Thalictrum sparsiflorum
Rosaceae	Amelanchier alnifolia
Rosaceae	Aruncus sylvester
Rosaceae	Comarum palustre
Rosaceae	Dryas integrifolia
Rosaceae	Fragaria virginiana
Rosaceae	Luetkea pectinata
Rosaceae	Pentaphylloides floribunda
Rosaceae	Potentilla diversifolia
Rosaceae	Potentilla hyparctica
Rosaceae	Potentilla uniflora
Rosaceae	Rosa acicularis
Rosaceae	Rubus arcticus
Rosaceae	Rubus chamaemorus
Rosaceae	Rubus pedatus
Rosaceae	Sanguisorba menziesii
Rosaceae	Spiraea stevenii

Rubiaceae	<i>Galium boreale</i>
Rubiaceae	<i>Galium trifidum</i> ssp. <i>trifidum</i>
Rubiaceae	<i>Galium triflorum</i>
Salicaceae	<i>Salix alaxensis</i>
Salicaceae	<i>Salix arbusculoides</i>
Salicaceae	<i>Salix barclayi</i>
Salicaceae	<i>Salix barrattiana</i>
Salicaceae	<i>Salix bebbiana</i>
Salicaceae	<i>Salix fuscescens</i>
Salicaceae	<i>Salix glauca</i>
Salicaceae	<i>Salix hastata</i>
Salicaceae	<i>Salix niphoclada</i>
Salicaceae	<i>Salix ovalifolia</i> var. <i>ovalifolia</i>
Salicaceae	<i>Salix polaris</i>
Salicaceae	<i>Salix pseudomyrsinites</i>
Salicaceae	<i>Salix pulchra</i>
Salicaceae	<i>Salix reticulata</i>
Salicaceae	<i>Salix sitchensis</i>
Saxifragaceae	<i>Parnassia palustris</i>
Saxifragaceae	<i>Ribes glandulosum</i>
Saxifragaceae	<i>Ribes laxiflorum</i>
Saxifragaceae	<i>Saxifraga</i>
Saxifragaceae	<i>Saxifraga</i>
Saxifragaceae	<i>Saxifraga calycina</i>
Saxifragaceae	<i>Saxifraga cernua</i>
Saxifragaceae	<i>Saxifraga flagellaris</i>
Saxifragaceae	<i>Saxifraga nelsoniana</i>
Saxifragaceae	<i>Saxifraga nivalis</i>
Saxifragaceae	<i>Saxifraga reflexa</i>
Saxifragaceae	<i>Saxifraga rivularis</i>
Saxifragaceae	<i>Saxifraga serpyllifolia</i>
Saxifragaceae	<i>Saxifraga tricuspida</i>
Saxifragaceae	<i>Tellima grandiflora</i>
Saxifragaceae	<i>Saxifraga eschscholtzii</i>
Scrophulariaceae	<i>Castilleja unalaschcensis</i>
Scrophulariaceae	<i>Lagotis glauca</i>
Scrophulariaceae	<i>Pedicularis arctoeuropaea</i>
Scrophulariaceae	<i>Pedicularis labradorica</i>
Scrophulariaceae	<i>Pedicularis langsdorffii</i>
Scrophulariaceae	<i>Pedicularis parviflora</i> ssp. <i>pennellii</i>
Scrophulariaceae	<i>Pedicularis verticillata</i>
Scrophulariaceae	<i>Rhinanthus minor</i>
Scrophulariaceae	<i>Veronica americana</i>

Scrophulariaceae	Veronica serpyllifolia
Scrophulariaceae	Veronica wormskjoldii
Sparganiaceae	Sparganium angustifolium
Sparganiaceae	Sparganium hyperboreum
Violaceae	Viola biflora
Violaceae	Viola epipsila
Violaceae	Viola langsдорffii

APPENDIX B

Vascular Plant specimens collected by the 2001 Lake Clark Vascular Plant Inventory.

All collections are held at the University of Alaska Museum Herbarium with a duplicate set at the Lake Clark National Park Herbarium. Nomenclature follows ALA and is largely consistent with ITIS. Coordinates for locations are noted in Table 1.

Family	Trinomial	General Locality	Specific locality	Coll. #
Asteraceae	<i>Achillea borealis</i>	Lake Clark outlet	Lake Clark outlet camp	01-19
Ranunculaceae	<i>Aconitum delphinifolium</i> ssp. <i>delphinifolium</i>	Lake Clark outlet		01-64
Ranunculaceae	<i>Aconitum delphinifolium</i> ssp. <i>delphinifolium</i>	Telaquana Lake	"Subdivision Mt." (elev 4300) at NE end of lake	01-30
Adoxaceae	<i>Adoxa moschatellina</i>	N Telaquana Badlands	E amphitheater	01-20
Poaceae	<i>Agrostis alaskana</i>	Tuxedni Bay - north of coast	N of Rusty Mt.	01-288
Poaceae	<i>Agrostis alaskana</i>	N Telaquana Badlands	ridge above W amphitheater	01-472
Poaceae	<i>Agrostis alaskana</i>	N Telaquana Badlands	ridge above W amphitheater	01-474
Poaceae	<i>Agrostis mertensii</i>	Kristen Creek	Kristen Creek cabin	01-316
Poaceae	<i>Agrostis mertensii</i>	Gladiator Basin	Secret Lake	01-373
Poaceae	<i>Agrostis mertensii</i>	Saddle Mt.	N of Lenore Hill	01-427
Poaceae	<i>Agrostis mertensii</i>	E end of Chinitna Bay - approximately 9 miles from coast	Ridge W of Red Glacier	01-449
Poaceae	<i>Agrostis scabra</i>	Stony R.	moose camp cabin w/ landing strip	01-12
Poaceae	<i>Agrostis scabra</i>	Stony R.	Vern Jone's Cabin	01-348
Poaceae	<i>Agrostis scabra</i>	Stony R.	Vern Jone's Cabin	01-354
Poaceae	<i>Agrostis scabra</i>	Port Alsworth	Leon Alsworth's garden	01-362
Poaceae	<i>Agrostis scabra</i>	Port Alsworth	Field Headquarters	01-367

Poaceae	<i>Agrostis scabra</i>	Port Alsworth	Field Headquarters	01-368
Poaceae	<i>Agrostis scabra</i>	Port Alsworth	Field Headquarters	01-369
Poaceae	<i>Agrostis scabra</i>	Silver Salmon Creek	ponds at Johnson R.	01-416
Poaceae	<i>Agrostis scabra</i>	Silver Salmon Creek	ponds at Johnson R.	01-417
Liliaceae	<i>Allium schoenoprasum</i>	Lake Clark outlet	Lake Clark outlet camp	01-04
Betulaceae	<i>Alnus viridis ssp. crispa</i>	Lake Clark outlet	Lake Clark outlet camp	01-36
Poaceae	<i>Alopecurus aequalis</i>	Twin Lakes	ponds W of Lower Twin L. & N of Chilikadrotna R.	01-174
Poaceae	<i>Alopecurus aequalis</i>	Silver Salmon Creek	ponds at Johnson R.	01-408
Amaranthaceae	<i>Amaranthus retroflexus</i>	Port Alsworth	Leon Alsworth's garden	01-308
Amaranthaceae	<i>Amaranthus retroflexus</i>	Port Alsworth	Leon Alsworth's garden	01-360
Rosaceae	<i>Amelanchier alnifolia</i>	W side Cook Inlet - coast near Silver Salmon Lakes	August Hill	01-256
Rosaceae	<i>Amelanchier alnifolia</i>	Tuxedni Bear Camp	S side of Tuxedni Bay, E of Open Creek	01-03
Ranunculaceae	<i>Anemone richardsonii</i>	Saddle Mt.	N of Lenore Hill	01-428
Apiaceae	<i>Angelica genuflexa</i>	Moose Pasture Pass	W side of pass on N side of river	01-206
Asteraceae	<i>Antennaria alpina</i>	N shore of Lake Clark	Mt. E of Portage Creek, N of Howard Bowman residence	01-04
Asteraceae	<i>Antennaria alpina</i>	Twin Lakes	ponds W of Lower Twin L. & N of Chilikadrotna R.	01-171
Asteraceae	<i>Antennaria alpina</i>	Igitna R. valley	Igitna R. cabin	01-332B
Asteraceae	<i>Antennaria friesiana</i>	Bonanza Hills	Quana Ridge, E of Whitefish Lake	01-01
Asteraceae	<i>Antennaria monocephala</i>	N side of Another R.	across from the Tusk	01-17
Asteraceae	<i>Antennaria monocephala</i>	Saddle Mt.	N of Lenore Hill	01-424
Asteraceae	<i>Antennaria rosea</i>	W of Igitna R.	slopes approx 5 mi N of Kenibuna L; N of Another R.	01-109
Asteraceae	<i>Antennaria rosea</i>	Igitna R. valley	Igitna R. cabin	01-332A

Asteraceae	<i>Antennaria rosea</i> ssp. <i>pulvinata</i>	N Telaquana Badlands		01-21
Asteraceae	<i>Antennaria rosea</i> spp. <i>pulvinata</i>	Twin Lakes	ponds W of Lower Twin L. & N of Chilikadrotna R.	01-167
Asteraceae	<i>Antennaria rosea</i> ssp. <i>pulvinata</i>	N of Two Lakes	ridge N of inlet to Two Lakes	01-95
Asteraceae	<i>Antennaria rosea</i> ssp. <i>pulvinata</i>	N side of Another R.	across from the Tusk	01-16
Asteraceae	<i>Antennaria rosea</i> ssp. <i>pulvinata</i>	W of Igitna R.	slopes approx 5 mi N of Kenibuna L; N of Another R.	01-112
Asteraceae	<i>Antennaria rosea</i> ssp. <i>pulvinata</i>	S end of park	Ridge 2 mi NW of Upper Tazimina L.	01-145
Asteraceae	<i>Antennaria rosea</i> ssp. <i>pulvinata</i>	W side Cook Inlet - coast near Silver Salmon Lakes	Slope Mountain	01-259
Asteraceae	<i>Antennaria rosea</i> ssp. <i>pulvinata</i>	Igitna R. valley	Igitna R. cabin	01-334
Brassicaceae	<i>Aphragmus eschscholtzianus</i>	S of Kontrashibuna L.	Ridge W of Kasna Ck Copper Mine	01-72
Brassicaceae	<i>Aphragmus eschscholtzianus</i>	valley between Turquoise Lake and sheep lick (E of s.l.)	cirque in upper basin of creek	01-123
Brassicaceae	<i>Arabis</i>	Saddle Mt.	N of Lenore Hill	01-430
Brassicaceae	<i>Arabis kamchatica</i>	Tlikakila River - North Fork	headwaters of N Fork of Tlikakila R.	01-193
Brassicaceae	<i>Arabis kamchatica</i>	Lake Clark outlet		01-63
Poaceae	<i>Arctophila fulva</i>	Little Mulchatna R.	approx 3km NE of Fishtrap L.	01-63
Poaceae	<i>Arctophila fulva</i>	Johnson River	beaver pond near (south of) Johnson R.	01-301
Plumbaginaceae	<i>Armeria maritima</i>	Lake Clark outlet	Lake Clark outlet camp	01-15
Asteraceae	<i>Arnica</i>	Hickerson Lake	tan hills to N	01-446
Asteraceae	<i>Arnica griscomii</i> ssp. <i>frigida</i>	Bonanza Hills	Quana Ridge, E of Whitefish Lake	01-02

Asteraceae	<i>Arnica griscomii</i> ssp. <i>frigida</i>	Port Alsworth	Tanalian Mt-Tanalian Falls trail junction	01-216
Asteraceae	<i>Arnica griscomii</i> ssp. <i>frigida</i>	N Telaquana Badlands	ridge above W ampitheater	01-473
Asteraceae	<i>Arnica lanceolata</i>	Horn Mt.	1st peak E of Brunn bay Fault	01-395
Asteraceae	<i>Arnica lanceolata</i>	E side of Lake Clark Pass	ridge at N corner of E most projection of park	01-465
Asteraceae	<i>Arnica lanceolata</i> ssp. <i>amplexicaulis</i>	E end of Chinitna Bay - approximately 9 miles from coast	Ridge W of Red Glacier	01-452
Asteraceae	<i>Arnica lanceolata</i> ssp. <i>amplexicaulis</i>	Hickerson Lake	tan hills to N	01-448B
Asteraceae	<i>Arnica latifolia</i>	Chinitna Bay - close to coast	ridge above E end of Chinitna Bay	01-267
Asteraceae	<i>Arnica latifolia</i>	Chinitna Bay - close to coast	ridge above E end of Chinitna Bay	01-268
Asteraceae	<i>Arnica latifolia</i>	Hickerson Lake	tan hills to N	01-443
Asteraceae	<i>Arnica latifolia</i>	E side of Lake Clark Pass	ridge at N corner of E most projection of park	01-464
Asteraceae	<i>Arnica latifolia</i>	N Telaquana Badlands	slopes above W ampitheater	01-482
Asteraceae	<i>Artemisia hyperborea</i>	Portage Lake	Mt. S of E end of lake	01-493
Asteraceae	<i>Artemisia tilesii</i>	Lake Clark outlet	Lake Clark outlet camp	01-43
Asteraceae	<i>Artemisia tilesii</i>	Tuxedni Bay - 7 miles north of coast	N side of Crescent R.	01-300
Asteraceae	<i>Artemisia tilesii</i>	Stony R.	Vern Jone's Cabin	01-346
Rosaceae	<i>Aruncus sylvester</i>	E end of Chinitna Bay - approximately 6 miles from coast	East Glacier Creek	01-276B
Asteraceae	<i>Aster sibiricus</i>	N of Twin Lakes	Fall's Mountain	01-53
Fabaceae	<i>Astragalus alpinus</i>	N of Two Lakes	ridge N of inlet to Two Lakes	01-90A
Fabaceae	<i>Astragalus alpinus</i>	S end of park adjacent to park boundary	Ridge SE of Lower Tazimina L.	01-54

Fabaceae	<i>Astragalus nutzotinensis</i>	N of Two Lakes	ridge N of inlet to Two Lakes	01-99
Fabaceae	<i>Astragalus polaris</i>	N of Telaquana Lake	ridge N of Telaquana Lake	01-12
Fabaceae	<i>Astragalus polaris</i>	N of Twin Lakes	Fall's Mountain	01-49
Chenopodiaceae	<i>Atriplex gmelinii</i>	Silver Salmon Creek	trail along salt marsh to Johnson R.	01-403
Betulaceae	<i>Betula glandulosa</i>	Lake Clark outlet	Lake Clark outlet camp	01-45
Betulaceae	<i>Betula kenaica</i>	Lake Clark outlet	Lake Clark outlet camp	01-38
Betulaceae	<i>Betula kenaica</i>	Port Alsworth	trail above Beaver Pond	01-312
Betulaceae	<i>Betula nana</i>	Lake Clark outlet	Lake Clark outlet camp	01-44
Orobanchaceae	<i>Boschniakia rossica</i>	Lake Clark outlet		01-62
Orobanchaceae	<i>Boschniakia rossica</i>	Stony River	opposite confluence of Stony R.- Kristen Ck	01-330
Ophioglossaceae	<i>Botrychium</i>	N Telaquana Badlands	E amphitheater	01-24
Ophioglossaceae	<i>Botrychium</i>	N Telaquana Badlands	E amphitheater	01-30A
Ophioglossaceae	<i>Botrychium</i>	N Telaquana Badlands	E amphitheater	01-32
Ophioglossaceae	<i>Botrychium</i>	N Telaquana Badlands	E amphitheater	01-486
Ophioglossaceae	<i>Botrychium alaskense</i>	N Telaquana Badlands	W amphitheater	01-25C
Ophioglossaceae	<i>Botrychium lanceolatum</i>	N Telaquana Badlands	W amphitheater	01-27
Ophioglossaceae	<i>Botrychium lanceolatum</i>	N Telaquana Badlands	E amphitheater	01-30B
Ophioglossaceae	<i>Botrychium lanceolatum</i>	Moose Pasture Pass	W side of pass on N side of river	01-208
Ophioglossaceae	<i>Botrychium lanceolatum</i>	Tuxedni Channel - 10 miles southwest of coast	Barren Hills	01-503
Ophioglossaceae	<i>Botrychium lanceolatum</i>	Hickerson Lake	tan hills to N	01-502
Ophioglossaceae	<i>Botrychium lanceolatum</i>	N Telaquana Badlands	E amphitheater	01-484
Ophioglossaceae	<i>Botrychium lunaria</i>	N Telaquana Badlands	W amphitheater	01-25A
Ophioglossaceae	<i>Botrychium lunaria</i>	N Telaquana Badlands	W amphitheater	01-25B
Ophioglossaceae	<i>Botrychium lunaria</i>	N Telaquana Badlands	E amphitheater	01-31

Ophioglossaceae	<i>Botrychium lunaria</i>	Portage Lake	W shore	01-217
Ophioglossaceae	<i>Botrychium lunaria</i>	Tuxedni Channel - 10 miles southwest of coast	Barren Hills	01-504
Ophioglossaceae	<i>Botrychium lunaria</i>	Hickerson Lake	tan hills to N	01-501
Ophioglossaceae	<i>Botrychium lunaria</i>	N Telaquana Badlands	W amphitheater	01-477A
Ophioglossaceae	<i>Botrychium lunaria</i>	N Telaquana Badlands	W amphitheater	01-477B
Ophioglossaceae	<i>Botrychium pinnatum</i>	N Telaquana Badlands	W amphitheater	01-22
Ophioglossaceae	<i>Botrychium pinnatum</i>	Tuxedni Channel - 10 miles southwest of coast	Barren Hills	01-505

Ranunculaceae	<i>Ranunculus gelidus</i>	N of Twin Lakes	Fall's Mountain	01-43
Ranunculaceae	<i>Ranunculus gelidus</i>	N end of park	Slopes N and above Chiligan R.	01-09
Ranunculaceae	<i>Ranunculus gelidus</i>	valley between Turquoise Lake and sheep lick (E of s.l.)	cirque in upper basin of creek	01-134
Ranunculaceae	<i>Ranunculus gmelinii</i>	Twin Lakes	ponds W of Lower Twin L. & N of Chilikadrotna R.	01-176
Ranunculaceae	<i>Ranunculus hyperboreus</i>	Twin Lakes	ponds W of Lower Twin L. & N of Chilikadrotna R.	01-150
Ranunculaceae	<i>Ranunculus nivalis</i>	valley between Turquoise Lake and sheep lick (E of s.l.)	cirque in upper basin of creek	01-127
Ranunculaceae	<i>Ranunculus occidentalis</i>	Tuxedni Channel - 10 miles southwest of coast	Barren Hills	01-441
Ranunculaceae	<i>Ranunculus occidentalis</i> var. <i>brevistylis</i>	W side of Cook Inlet - approximately 8 miles from coast	S of Red Creek	01-387
Ranunculaceae	<i>Ranunculus occidentalis</i> var. <i>brevistylis</i>	W side of Cook Inlet - approximately 8 miles from coast	S of Red Creek	01-388
Ranunculaceae	<i>Ranunculus occidentalis</i> var. <i>brevistylis</i>	Hickerson Lake	tan hills to N	01-445
Ranunculaceae	<i>Ranunculus occidentalis</i> var. <i>brevistylis</i>	E side of Lake Clark Pass	ridge at N corner of E most projection of park	01-462
Ranunculaceae	<i>Ranunculus reptans</i>	Lake Clark outlet	Lake Clark outlet camp	01-29
Scrophulariaceae	<i>Rhinanthus minor</i>	Little Mulchatna R.	approx 3km NE of Fishtrap L.	01-70

Scrophulariaceae	Rhinanthus minor	Portage Lake	W shore	01-228
Scrophulariaceae	Rhinanthus minor	W side Cook Inlet - coast near Silver Salmon Creek	Silver Salmon Creek Lodge	01-307
Scrophulariaceae	Rhinanthus minor	Stony R.	moose camp cabin w/ landing strip	01-11
Crassulaceae	Rhodiola integrifolia	N of Telaquana Lake	ridge N of Telaquana Lake	01-14
Ericaceae	Rhododendron lapponicum	N end of park	Slopes N and above Chiligan R.	01-05
Saxifragaceae	Ribes glandulosum	S end of park	Ridge 2 mi NW of Upper Tazimina L.	01-138
Saxifragaceae	Ribes glandulosum	Silver Salmon Creek	ponds at Johnson R.	01-409
Saxifragaceae	Ribes laxiflorum	Moose Pasture Pass	W side of pass on N side of river	01-209
Brassicaceae	Rorippa palustre	Portage Lake	W shore	01-250
Brassicaceae	Rorippa palustris	Portage Lake	W shore	01-225
Brassicaceae	Rorippa palustris	Portage Lake	W shore	01-230
Rosaceae	Rosa acicularis	Port Alsworth	shore of Hardenberg Bay-Bly House	01-34
Rosaceae	Rosa acicularis	Lake Clark outlet	Lake Clark outlet camp	01-16
Rosaceae	Rubus arcticus	Lake Clark outlet	Lake Clark outlet camp	01-18
Rosaceae	Rubus chamaemorus	Lake Clark outlet	Lake Clark outlet camp	01-22
Rosaceae	Rubus pedatus	Tuxedni Bear Camp	S side of Tuxedni Bay, E of Open Creek	01-07
Polygonaceae	Rumex acetosa	N shore of Lake Clark	Mt. E of Portage Creek, N of Howard Bowman residence	01-05
Polygonaceae	Rumex acetosella	Port Alsworth	Glen Alworth's runway	01-363
Polygonaceae	Rumex arcticus	Port Alsworth	Hardenberg Bay	01-09
Polygonaceae	Rumex arcticus	Twin Lakes	ponds W of Lower Twin L. & N of Chilikadrotna R.	01-160
Polygonaceae	Rumex arcticus	Johnson River	beaver pond near (south of) Johnson R.	01-302

Polygonaceae	Rumex arcticus	Lake Clark outlet	Sucker Bay	01-54
Polygonaceae	Rumex beringensis	N end of park	Slopes N and above Chiligian R.	01-07
Polygonaceae	Rumex beringensis	N of Two Lakes	ridge N of inlet to Two Lakes	01-97
Polygonaceae	Rumex beringensis	N of Two Lakes	ridge N of inlet to Two Lakes	01-98
Polygonaceae	Rumex beringensis	Lake Clark outlet	Lake Clark outlet camp	01-07
Caryophyllaceae	Sagina intermedia	E end of Chinitna Bay - approximately 4 miles from coast	East Glacier Creek	01-285
Salicaceae	Salix alaxensis	N end of park	Head of Necons and Chilligan R.	01-11
Salicaceae	Salix arbusculoides	Portage Lake	mountain to SW of lake	01-03
Salicaceae	Salix barclayi	Ridges 6 mi. W of Kejik L	just N of pt. 3312	01-81
Salicaceae	Salix barclayi	Igitna R. valley	near headwaters	01-116
Salicaceae	Salix barclayi	Igitna R. valley	near headwaters	01-117
Salicaceae	Salix barclayi	Tlikakila River - North Fork	headwaters of N Fork of Tlikakila R.	01-185
Salicaceae	Salix barclayi	Tlikakila River - North Fork	headwaters of N Fork of Tlikakila R.	01-186
Salicaceae	Salix barclayi	Tuxedni Bear Camp	S side of Tuxedni Bay, E of Open Creek	01-12
Salicaceae	Salix barclayi	Tuxedni Bear Camp	S side of Tuxedni Bay, E of Open Creek	01-13
Salicaceae	Salix barrattiana	Tuxedni Bay - north of coast	N of Rusty Mt.	01-292
Salicaceae	Salix bebbiana	Lake Clark outlet	Lake Clark outlet camp	01-46
Salicaceae	Salix fuscescens	Tuxedni Bay - north of coast	N of Rusty Mt.	01-293
Salicaceae	Salix glauca	NE of Two Lakes	Ridge above Tlikakila R.	01-04
Salicaceae	Salix glauca	Lake Clark outlet	Lake Clark outlet camp	01-41
Salicaceae	Salix glauca	Ignita River	Kenibuna Lake cabin - on shore of Ignita River where it connects to Kenibuna Lake	01-344

Salicaceae	<i>Salix hastata</i>	Tuxedni Bear Camp	S side of Tuxedni Bay, E of Open Creek	01-14
Salicaceae	<i>Salix niphoclada</i>	Twin Lakes	ponds W of Lower Twin L. & N of Chillikadrotna R.	01-159
Salicaceae	<i>Salix ovalifolia</i> var. <i>ovalifolia</i>	headwaters of Chilligan R.	S trending ridge above S side of Chilligan R.	01-23
Salicaceae	<i>Salix polaris</i>	Telaquana Lake	"Subdivision Mt." (elev 4300) at NE end of lake	01-38
Salicaceae	<i>Salix pseudomyrsinites</i>	Tlikakila River - North Fork	headwaters of N Fork of Tlikakila R.	01-187
Salicaceae	<i>Salix pulchra</i>	N Telaquana Badlands		01-26
Salicaceae	<i>Salix pulchra</i>	Moose Pasture Pass	W side of pass on N side of river	01-199
Salicaceae	<i>Salix pulchra</i>	Tuxedni Bear Camp	S side of Tuxedni Bay, E of Open Creek	01-11
Salicaceae	<i>Salix reticulata</i>	Portage Lake	Mt. S of E end of lake	01-495
Salicaceae	<i>Salix sitchensis</i>	Johnson River	Near junction of Johnson River and Red Creek	01-251
Rosaceae	<i>Sanguisorba menziesii</i>	Lake Clark outlet	Lake Clark outlet camp	01-08
Asteraceae	<i>Saussurea angustifolia</i>	Lake Clark outlet	Lake Clark outlet camp	01-49
Asteraceae	<i>Saussurea angustifolia</i>	Portage Lake	Mt. S of E end of lake	01-487
Asteraceae	<i>Saussurea nuda</i>	Silver Salmon Creek	ponds at Johnson R.	01-414
Saxifragaceae	<i>Saxifraga</i>	Portage Lake	mountain to SW of lake	01-08
Saxifragaceae	<i>Saxifraga</i>	Kristen Creek	Kristen Creek cabin	01-321
Saxifragaceae	<i>Saxifraga calycina</i>	S of Kontrashibuna L.	Ridge W of Kasna Ck Copper Mine	01-73
Saxifragaceae	<i>Saxifraga calycina</i>	headwaters of Chilligan R.	S trending ridge above S side of Chilligan R.	01-24
Saxifragaceae	<i>Saxifraga cernua</i>	N of Twin Lakes	Fall's Mountain	01-45
Saxifragaceae	<i>Saxifraga eschscholtzii</i>	S of Kontrashibuna L.	Ridge W of Kasna Ck Copper Mine	01-61

Saxifragaceae	<i>Saxifraga eschscholtzii</i>	Portage Lake	Mt. S of E end of lake	01-489B
Saxifragaceae	<i>Saxifraga flagellaris</i>	N of Two Lakes	ridge N of inlet to Two Lakes	01-88
Saxifragaceae	<i>Saxifraga flagellaris</i>	Portage Lake	Mt. S of E end of lake	01-488B
Saxifragaceae	<i>Saxifraga nelsoniana</i>	Telaquana Lake	"Subdivision Mt." (elev 4300) at NE end of lake	01-33
Saxifragaceae	<i>Saxifraga nelsoniana</i>	Telaquana Lake	"Subdivision Mt." (elev 4300) at NE end of lake	01-36
Saxifragaceae	<i>Saxifraga nelsoniana</i>	Telaquana Lake	"Subdivision Mt." (elev 4300) at NE end of lake	01-37
Saxifragaceae	<i>Saxifraga nivalis</i>	S of Kontrashibuna L.	Ridge W of Kasna Ck Copper Mine	01-58
Saxifragaceae	<i>Saxifraga nivalis</i>	S of Kontrashibuna L.	Ridge W of Kasna Ck Copper Mine	01-62
Saxifragaceae	<i>Saxifraga reflexa</i>	S of Kontrashibuna L.	Ridge W of Kasna Ck Copper Mine	01-69
Saxifragaceae	<i>Saxifraga rivularis</i>	S of Kontrashibuna L.	Ridge W of Kasna Ck Copper Mine	01-74
Saxifragaceae	<i>Saxifraga rivularis</i>	headwaters of Chilligan R.	S trending ridge above S side of Chilligan R.	01-25
Saxifragaceae	<i>Saxifraga serpyllifolia</i>	headwaters of Chilligan R.	S trending ridge above S side of Chilligan R.	01-21
Saxifragaceae	<i>Saxifraga tricuspida</i>	N end of park	Slopes N and above Chilligan R.	01-06
Asteraceae	<i>Senecio congestus</i>	Portage Lake	W shore	01-231
Asteraceae	<i>Senecio lugens</i>	N Telaquana Badlands	camp by pond	01-468
Asteraceae	<i>Senecio lugens</i>	N Telaquana Badlands	W amphitheater	01-475
Asteraceae	<i>Senecio triangularis</i>	N shore of Lake Clark	Mt. E of Portage Creek, N of Howard Bowman residence	01-06
Asteraceae	<i>Senecio triangularis</i>	E end of Chinitna Bay - approximately 4 miles from coast	East Glacier Creek	01-282
Caryophyllaceae	<i>Silene acaulis</i>	N of Twin Lakes	Fall's Mountain	01-39

Asteraceae	<i>Solidago canadensis</i> var. <i>salebrosa</i>	E end of Chinitna Bay - approximately 4 miles from coast	East Glacier Creek	01-283
Asteraceae	<i>Solidago multiradiata</i> var. <i>multiradiata</i>	Lake Clark outlet	Lake Clark outlet camp	01-20
Sparganiaceae	<i>Sparganium angustifolium</i>	Port Alsworth	pond at "the Point"	01-22
Sparganiaceae	<i>Sparganium hyperboreum</i>	Twin Lakes	ponds W of Lower Twin L. & N of Chilikadrotna R.	01-173
Sparganiaceae	<i>Sparganium hyperboreum</i>	Twin Lakes	ponds W of Lower Twin L. & N of Chilikadrotna R.	01-175
Sparganiaceae	<i>Sparganium hyperboreum</i>	Port Alsworth	Beaver Pond	01-215
Sparganiaceae	<i>Sparganium hyperboreum</i>	Portage Lake	W shore	01-249
Caryophyllaceae	<i>Spergula arvensis</i>	Silver Salmon Creek	John Issac's Lodge garden	01-377
Rosaceae	<i>Spiraea stevenii</i>	Lake Clark outlet	Lake Clark outlet camp	01-10
Orchidaceae	<i>Spiranthes romanzoffiana</i>	Lake Clark outlet	Sucker Bay	01-53
Caryophyllaceae	<i>Stellaria borealis</i>	Tlikakila River - North Fork	headwaters of N Fork of Tlikakila R.	01-192
Caryophyllaceae	<i>Stellaria borealis</i> ssp. <i>borealis</i>	Chinitna Bay - close to coast	ridge above E end of Chinitna Bay	01-269
Caryophyllaceae	<i>Stellaria borealis</i> ssp. <i>sitchana</i>	Tlikakila River - North Fork	headwaters of N Fork of Tlikakila R.	01-188
Caryophyllaceae	<i>Stellaria crassifolia</i>	Twin Lakes	ponds W of Lower Twin L. & N of Chilikadrotna R.	01-154
Caryophyllaceae	<i>Stellaria edwardsii</i>	Twin Lakes	ponds W of Lower Twin L. & N of Chilikadrotna R.	01-162
Caryophyllaceae	<i>Stellaria edwardsii</i>	Portage Lake	W shore	01-239
Caryophyllaceae	<i>Stellaria longifolia</i>	Lower Necons R.	East bank of lower Necons R.	01-358
Caryophyllaceae	<i>Stellaria longipes</i>	Lake Clark outlet		01-60
Caryophyllaceae	<i>Stellaria media</i>	W side Cook Inlet - coast near Silver Salmon Creek	Silver Salmon Creek Lodge	01-306

Potamogetonaceae	<i>Stuckenia filiformis</i>	Silver Salmon Creek	ponds at Johnson R.	01-407
Potamogetonaceae	<i>Stuckenia vaginatus</i>	Twin Lakes	ponds W of Lower Twin L. & N of Chilikadrotna R.	01-170
Asteraceae	<i>Taraxacum carneocoloratum</i>	S of Kontrashibuna L.	Ridge W of Kasna Ck Copper Mine	01-68
Asteraceae	<i>Taraxacum ceratophorum</i>	N of Twin Lakes	Fall's Mountain	01-40
Asteraceae	<i>Taraxacum ceratophorum</i>	Portage Lake	W shore	01-222
Asteraceae	<i>Taraxacum kamtschaticum</i>	N Telaquana Badlands		01-29
Asteraceae	<i>Taraxacum kamtschaticum</i>	Bonanza Hills	Ridge E of VABM "Bonanza"	01-36
Asteraceae	<i>Taraxacum kamtschaticum</i>	headwaters of Chilligan R.	S trending ridge above S side of Chilligan R.	01-32
Asteraceae	<i>Taraxacum kamtschaticum</i>	W of Igitna R.	slopes approx 5 mi N of Kenibuna L; N of Another R.	01-102
Asteraceae	<i>Taraxacum kamtschaticum</i>	valley between Turquoise Lake and sheep lick (E of s.l.)	cirque in upper basin of creek	01-119
Asteraceae	<i>Taraxacum kamtschaticum</i>	S end of park adjacent to park boundary	Ridge SE of Lower Tazimina L.	01-48
Asteraceae	<i>Taraxacum kamtschaticum</i>	Little Mulchatna R.	approx 3km NE of Fishtrap L.	01-72
Asteraceae	<i>Taraxacum kamtschaticum</i>	Twin Lakes	ponds W of Lower Twin L. & N of Chilikadrotna R.	01-172
Asteraceae	<i>Taraxacum kamtschaticum</i>	Tuxedni Channel - 10 miles southwest of coast	Barren Hills	01-437
Asteraceae	<i>Taraxacum kamtschaticum</i>	Tuxedni Channel - 10 miles southwest of coast	Barren Hills	01-438
Saxifragaceae	<i>Tellima grandiflora</i>	E end of Chinitna Bay - approximately 6 miles from coast	East Glacier Creek	01-277
Saxifragaceae	<i>Tellima grandiflora</i>	Hickerson Lake	tan hills to N	01-448A
Asteraceae	<i>Tephrosieris lindstroemii</i>	W of Igitna R.	slopes approx 5 mi N of Kenibuna L; N of Another R.	01-113

Asteraceae	<i>Tephrosia lindstroemii</i>	Horn Mt.	1st peak E of Brunn bay Fault	01-389
Ranunculaceae	<i>Thalictrum sparsiflorum</i>	Moose Pasture Pass	W side of pass on N side of river	01-205
Brassicaceae	<i>Thlaspi arcticum</i>	Tuxedni Channel - 10 miles southwest of coast	Barren Hills	01-435
Cyperaceae	<i>Trichophorum caespitosum</i>	S end of park adjacent to park boundary	Ridge SE of Lower Tazimina L.	01-57
Cyperaceae	<i>Trichophorum caespitosum</i>	Tuxedni Bear Camp	S side of Tuxedni Bay, E of Open Creek	01-02
