

This checklist was created as part of the Research Reserve's Kachemak Bay Ecological Characterization CD-ROM project.

The Kachemak Bay Ecological Characterization, published in 2001 and currently available online at www.kbayrr.org, is a digital source of information and data important to the understanding and management of Kachemak Bay ecosystems. Please be aware that this may not be a comprehensive document and is a work in progress. It will be updated periodically by the Kachemak Bay Research Reserve staff with new information, as it becomes available.
