

Small Mammal Group Meeting

Tuesday, March 27, 2018, 12:00 – 13:30, Regional Directors Conference Room*, Glenn A. Olds Hall, APU Campus

Meeting Goals:

- Compile a list of contact information and research activities of attendees.
- Provide a forum for researchers working on small mammals to discuss information gaps and future research priorities.
- Discuss a collaborative manuscript that synthesizes conservation concerns and data gaps for small mammals in the state of Alaska. This paper will describe the Alaska Species Ranking System (ASRS) as a tool to identify species of concern. It will also present findings from an expert elicitation to identify threats, conservation actions, and research needs.

Agenda

1. Introductions and contact information with area of expertise.
2. We will be conducting an expert elicitation over email, asking small mammal experts about species-specific threats, research needs, and conservation actions. Feedback on this idea would be appreciated.
3. Manuscript: “Conservation status and threats to small mammals in Alaska: a synthesis”. Please indicate your interest in participating.

Adjourn to 49th State Brewing Company at 6pm for more discussion
Address: 2104, 717 W 3rd Ave, Anchorage

*If attending the TWS meeting, you will need to walk from Rasmuson Hall in the Atwood Building to Glenn Olds Hall (<https://www.alaskapacific.edu/visit/campus-map/>). To get to the RD conference room, enter the main doors of Glenn Olds Hall, sign in at the front desk, and walk through the kitchen to a small conference room on your left.
